There is so much rubbish in the sea. It is very dangerous for plants and animals that live there. We must be more careful with our rubbish. Birds get caught in the plastic and can't fly. We use plastic bags to carry our food from the supermarket. Some of these bags go in the sea. Turtles may eat them because they look like jellyfish. Whales can get plastic caught in their mouths. All because some people don't take care of their rubbish! So we all must recycle it! Let's make the world a cleaner place!

Dinosaur Days

Read the story then answer the questions.

Dinosaurs lived a very long time ago. Today we can only see them in books, on the TV and in museums. People think they were big and scary but there were lots of little dinosaurs as well. A long time ago a big rock from space hit the Earth. This made dust cover the sky so that the Sun could not shine and help the plants grow. There was not a lot of food for the big dinosaurs. Only smaller animals could find enough food to eat. This is why you can not see a dinosaur walking down your street today!
